## **Transportation Improvement Program**

**Fiscal Years 2009 – 2013**

American Recovery & Reinvestment Act Project Amendments

(Adopted: March 11, 2009)

## Introduction

The DeKalb Sycamore Area Transportation Study (DSATS) Transportation Improvement Program (TIP) represents planned transportation improvements for Fiscal Years 2009 - 2013. The TIP is a short-range capital improvements program outlining a four-year schedule of projects that have been locally approved by DSATS to receive federal funding. The DSATS TIP also includes some of the projects funded (or expected to be funded) by the Illinois Department of Transportation, the Federal Transit Administration, local jurisdictions, and other funding sources. Local funds can include funding from municipalities, counties, and transportation providers.

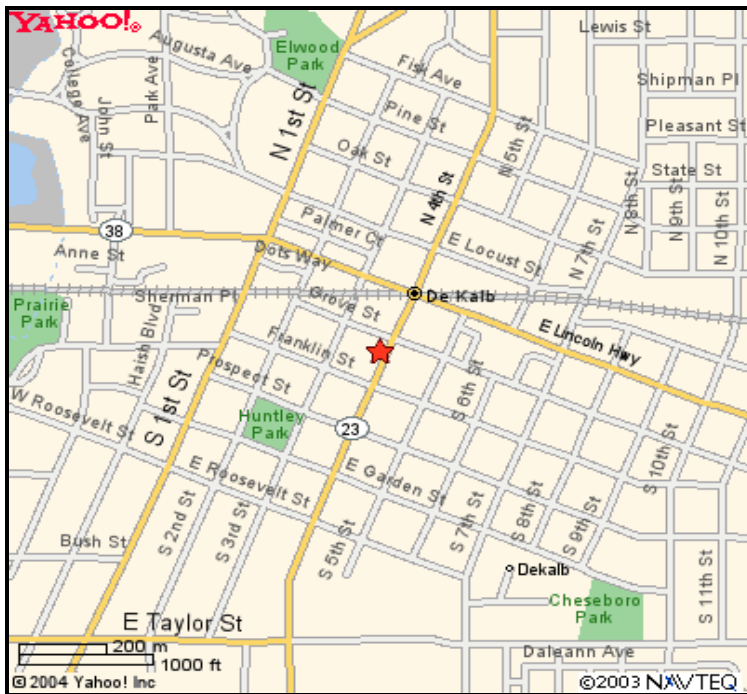

The TIP is designed to meet the area's transportation goals by programming projects that address capacity needs, congestion reduction, transit service needs, air quality improvements, and transportation enhancements. The TIP is the tool by which the public can understand and comment on the planned transportation projects for FY 2009-2013.

The DSATS TIP covers the Metropolitan Planning Organization's transportation planning area, including the City of DeKalb, the City of Sycamore, the Town of Cortland, and portions of DeKalb County. Approximate street boundaries of the urbanized area are Mayfield Road, Nelson Road, Keslinger Road, and Airport Road.

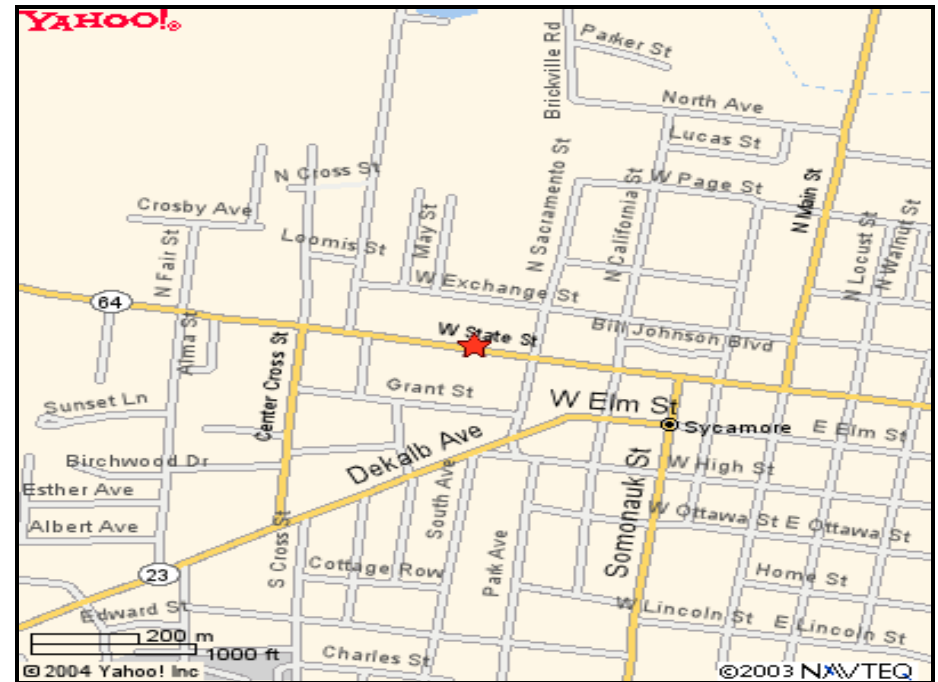

This special TIP Amendment is an update to the FY 2009-2013 DSATS TIP. The projects listed are projects that DSATS has submitted to be funded by grant funds received from the American Recovery & Reinvestment Act. Please note that implementation of some or all of these projects is contingent upon funds being made available through the Federal American Recovery and Reinvestment Act (ARRA), the level of funding made available to the DSATS area, and the eligibility of these projects to be part of the federal bill.
